EEPC India invites participation

The lighting of the lamp signalling the start of IESS VI in Chennai on 16 March 2017

A quick rewind to IESS VI

IESS VI had many firsts – first time

- in Chennai
- Technology and Industry 4.0 as the theme
- Russia as the Partner Country and
- Biometric inauguration

The VIth edition saw 13 sessions, 100 speakers, 500 delegates from 100 nations, 1,200 B2B meetings, 10,000 business contacts and over 20,000 business enquiries.

On IESS VII

Indian engineering is moving **Fast Forward**. The country has become one of the most preferred locations for engineering offshoring. Companies across various sectors (such as IT, consumer electronics, personal devices, medical electronics, telecom and automobiles) are now offshoring complete product responsibility.

By 2020, USD42 billion worth of work related to R&D of product engineering is expected to be outsourced to India,

growing by a CAGR of 22.7 per cent. India's supply base is currently involved in supporting leading innovations across multiple industries including automotive (hybrid technology), aerospace (avionics and structures), telecom (next generation routers), and medical devices (low cost medical devices).

But more still needs to be done before we embrace the fourth Industrial Revolution.

In response to the success of IESS VI which created the forum for unlearning our old technology and learning the new and the latest in engineering, IESS VII will resolve all the myths of industry 4.0 and help us to seamlessly integrate Industry 4.0 into our manufacturing system making it 'truly smart'!
